Housing Services

Regular Performance Report

Distributed: **November 2004**

Key

- ↑ Good (target or better)
- Acceptable (within 5%)
- ↓ Unacceptable

Housing Services – Performance Summary

Reporting Period: September 2004

Indicator	Target	Actual	% Outturn	Headline Performance
Notification: percentage of new Housing Register applicants advised of their position within 5 days?	100%	50 out of 53	94%	→
Homelessness: percentage of applications with cases determined during last month in 33 days or less?	100%	9 out of 13	69%	↓
B & B: average length of stay in B & B Accommodation (of those moving out last month)?	4 Weeks	2 Leavers	1 day	↑
Hostel: average length of stay in Hostel Accommodation (of those moving out last month)?	5 Weeks	2 Leavers	7 Weeks	↓
Appointments: number of responsive (not emergency) repairs carried out by appointment?	25%	0	No system	Spring 2005
Emergency Repairs: percentage completed during the last month in less than 1 working day of report?	95%	175 out of 180	97%	↑
Urgent Repairs: percentage completed during the last month in less than 3 working days of report?	85%	74 out of 101	71%	↓
Routine Repairs: percentage completed during the last month within target dates (9 & 28 day)?	85%	187 out of 343	72%	↓
Visits: Percentage of Sheltered tenants who, in the last month, were visited 5 times in every 10 days?	100%	1087 out of 1087	100%	↑
Fire Alarms: Percentage of alarms in Sheltered Housing that in the last month, had been tested every two weeks?	100%	12 Schemes ¹ out of 12	100%	↑
Voids: for activity in the last month, the average time from the end of the previous tenancy to re-letting.	22 Calendar days	28 Properties Let	123 Calendar days	↓
Rent: Percentage of the possible rent that was collected by the end of last month (bvpi 66A)	98.2%	£4,063 k out of £4,123 k	98.5%	↑

¹ Schemes with integral fire alarms tested.

Housing Services – Performance

An overall performance assessment for Housing Services at this time produces mixed impressions and clearly indicates that there is still much to do to promote a real culture of quality within the organisation. The present difficulty in accessing meaningful data is an important blockage to the dialogue that the service must encourage such a culture and great things have to be expected of the investment in the Orchard database system with regard to performance management.

The quality of customer care in Sheltered Housing is clearly now exemplary, with commitments being met 100% of the time. It will be essential to explore the needs and aspirations of residents, setting and monitoring targets around these so as not to become complacent or misdirected in the future.

Financial management has shown consistent improvement in the last 6 months, with only 1.5% of rent uncollected during September. This contrasts with a 14.7% rate during April, however this poor showing is thought to be mostly due to budget reconciliations on benefit changes at the beginning of the financial year. Overall debt levels have fallen by 37% since the beginning of this financial year mainly due to the write off of some longstanding debt.

The number of people presenting as homeless has roughly doubled in the last 6 months. This appears to be a consistent trend. Processing times for homeless people have consequentially increased, with resolutions within the 33 day target falling.

There have only been two evictions made during the last 6 months. This is probably indicative of success by Tenant Liaison Officers in resolving problems at an early stage and in administering Possession and Suspended Possession Orders without recourse to the final sanction. Relatedly, complaints of Anti-Social Behaviour have fallen slightly through the last 6 months. The largest number, 30% of the total, were responses to harassment and bullying.

The number and cost of repairs completed by the DSO have both reduced (by 10% and 28% respectively) as new management regimes have sought to drive up the response time on routine repairs and provide a more cost effective answer to preparing empty properties for rehabilitation. Response times for emergency calls remain consistent at 97%, while urgent and routine work have both improved, but only to a level where 7 out of ten are met within target days. These processes are currently under review.

The void rates are now known to differ widely between General Purpose and Sheltered properties with the former closer to the target. There are still a number of Sheltered Properties that are proving difficult to let due to design, services or location and it is this core of properties that is having such a detrimental affect on average re-let times.

Dave Whiteley
Performance Manager

Background Data – Half Year Ending: Sept 2004

Unless stated counts are taken at the end of each month.
