Appendix 1

Asset Management Software Requirements

DATA IN/OUT-FINANCIAL Current 'MRA Excel Spreadsheet' detailing capital works –'Key Components' Under Decent Homes Planned External Electrics (Re Data Windows / Doors Bathrooms Heating Roofs Kitchens Wires, Smokes) Maintenance Subject: Other Changes Reactive Repairs / Voids / Adaptations / Social Decarbonisation Fund Works / Ongoing compliance checks, cyclical maintenance to Asset Value: Financial information to be extracted from various systems and sources to a single location that provides management reporting functions to allow costing analysis, identify patterns and trends and strategically plan Use Case whole asset management lifecycle Needed: All contractors to be set up on the system so that financial information links directly to orders raised on the system this will give proper cost analysis rather than manual reconciliation of emailed orders

As set data needs to be synchronised with the Repairs system so that operatives, contractors and staff have access to component information which will inform decision making around repairs and defect liability periods

DATA IN - Current Reconciliation With Other Data Sources

Assets – System Data Required From Other Software / Sources to keep Asset Information current and up to date

Grounds Sold Property Data New Property Data Maintenance Subject: Data **Asset Data** Local Land and Property Astun GIS Software / Ad Software / Strategic Housing hoc additions raised via **RAMS / MRI Enterprise** Gazetteer (LLPG) (new Data (property attribute data) queries property address data) Source: GIS Shapefiles, Excel, CSV File / Business CSV / Excel / PDFs/ Data CSV file PDFs of maps Word files? **Objects Report** Format: Ensures all new Informs Maintenance Programmes for properties contain Ensure sold properties accurate and up to Housing Land. Such as: are 'retired from date addresses Informs Maintenance Planned grass cutting, s vs te m' Programmes and streetscene LLPG UPRN can be compliance scheduling schedules, Plan future works for works on new used as the 'golden Planned maintenance any maintenance thread' a cross council properties scheduling on garage obligations that are data sets (will ensure agreed for post sale sites, Housingland etc ease of use of Business Objects) Creation of Creation of Housing Retire property and Data Synchronisation: Use Case Improvement Schedules Maintenance Schedule decommission any add/amend/delete Required: and Compliance of Works works planned. address data **Programmes** Ad hocplus when As and when changes As and when changes As and when changes Frequency: complaints arise emerge emerge emerge

These processes are currently manually inputted into the Asset Recording Software and manually updated in every compliance excel spreadsheet and within MRI Enterprise

Adaptions Data

Disabled Facilities Grants (Capital works –attribute data and maintenance schedules

Planned and **Reactive Repairs** Data

MRI (works over certain value-= Capital works /attribute data and maintenance schedules)

CSV file

Excel File

Enable Housing Officers to allocate suitable houses post void.

Enable accurate property attribute data used to plan works and gauge amount spent on property

Used as part of Right to Buy - £ spent on property

Used to inform decision on Void management and planned works

Data Synchronisation: add / amend / delete adaption data Data Synchronisation: add / amend / delete repair data (inc. cost)

As and when changes emerge

As and when changes emerge

Data currently sits in its respective software application and isn't linked or shared with other applications

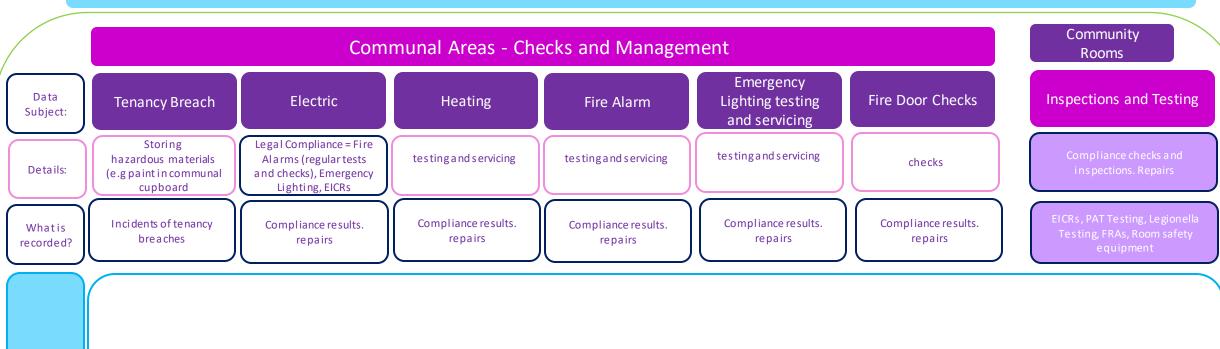

DATA IN/OUT-FLEGAL-Legal and Regularity Requirements

Contractors to feed results directly into the solution via existing contractor portal in MRI Repairs and report on overall compliance management—dashboard. Contractors to feed results directly into the solution via existing contractor portal in MRI Repairs and report on overall compliance management—dashboard.

These compliance workstreams are managed predominantly by email and excel spreadsheets. Results are recorded a cross multiple systems manually. Many of the data formats are non compatible for management reporting (PDF compliance reports as opposed to CSV files). Remedial works and compliance results are not automated or linked to other systems. No overall compliance dashboards to workflow performance trackers. Risk information not readily available to Direct La bour Organisation for repair Risk Assessment Planning

Compliance / survey data needs to be synchronised with the Repairs system so that operatives and contractors have access to key risk information such as asbestos risk information

DATA IN/OUT-FLEGAL

Purpose

 $Meet\,Health, Safety\,and\,Compliance\,legal\,and\,regulatory\,re\,quirements.$

Use Case Needed:

Workflow management to raise repair, inspection and tenancy management jobs. Record and store Compliance Reports and report on overall compliance management -dashboard
