

Q3.1 Tackle climate change:

- Stronger public transport links are needed. Currently operating railways should be developed in partnership with train operators and Network Rail to serve the people of the district. Better access to rail, including extra car parking, is needed. More urban bus services should be extended to serve those living in rural areas beyond the Derby City boundary. In some rural areas improved highway infrastructure is needed to better accommodate buses.
- Need for direct public transport links to Derby City Hospital
- Need for improved public transport links to Faith Schools

Q3.2 Support economic growth:

- Provide new road infrastructure to serve the former Drakelow power station site, including a new highway bridge across the River Trent from Branston
- Provide new highway alternative to Swarkestone Causeway
- Tackle congestion on High Street, Woodville

Q3.3 Promote equality of opportunity:

- Stronger public transport links are needed. Currently operating railways should be developed in partnership with train operators and Network Rail to serve the people of the district. Better access to rail, including extra car parking, is needed. More urban bus services should be extended to serve those living in rural areas beyond the Derby City boundary. In some rural areas improved highway infrastructure is needed to better accommodate buses.
- Need improved public transport to Faith Schools
- Need improved public transport to Derby City Hospital

Q3.4 Contribute to better safety, security and health:

- Keep heavy traffic out of small villages throughout the District
- Improve public transport links to Derby City Hospital
- Provide new highway alternative to Swarkestone Causeway
- Tackle congestion on High Street, Woodville

Q3.5 Improve quality of life and promote a healthy natural environment (includes protecting built environment):

- Keep heavy traffic out of small villages throughout the District
- Protect against the potential negative impacts for neighbouring areas of the proposed Formula One Grand Prix at Donington Park
- Provide new highway alternative to Swarkestone Causeway
- Tackle congestion on High Street, Woodville

Q3.6 Any other comments

It was suggested that any new road / rail freight interchange in the district could draw additional traffic onto local roads, so that solving a regional / national problem could cause local problems.
