

Appendix C: Health and Safety - Accident Statistics 2014/15

Purpose of the Report

This report provides an overview of the number of accidents that have occurred during the period 1 October to 31 December 2014 within the Council.

Background

The Health & Safety Officer provides advice and training on health and safety matters across the Council. This Officer is also responsible for producing management information on the number of accidents. These are collated on a regular basis and are reported to the joint Health & Safety Committee. This Committee reviews the accidents and makes recommendations or learning that needs to be implemented.

Accident Statistics

The Council's accident statistics are broken down into reportable and non-reportable accidents.

Reportable accidents are those covered by RIDDOR (Reporting of Injuries, Diseases & Dangerous Occurrences Regulations, 1995). These accidents have to be reported to the Health and Safety Executive and include:

- Where a member of staff has been required to stay in hospital for 24 hours after an accident;
- Where a member of the public was taken to hospital for treatment after the accident;
- If the accident results in the member of staff being off work for 3 days after the date of the accident,

The table overleaf shows the number of accidents that have occurred during the current quarter by reportable accident type and category and the year to date.

During the third quarter of 2014/15 there were 7 accidents, all involving employees, except for a trip/fall by a member of the public. None of the incidents were of a reportable nature. As a result, existing risk assessments have been reviewed and control measures reinforced.

The table also provides comparative details of the number of accidents for the previous year (2013/14)
